

Cable USB 2.0 > Blu-ray/DVD/CD/ drive sharing

Description

This USB 2.0 cable by Delock enables your netbook and notebook without an optical drive to access the optical drive of another system. The cable can simply be connected to your notebook and can be linked e.g. to a PC with integrated CD-/DVD- or Blu-ray drive. Your notebook will recognize the optical drives of the PC as external drives and can use them for different applications without any problem.
